Key Facts

India has the second-largest population in the world.

The population was 1.38 billion in 2020, around one sixth of the world's total population.

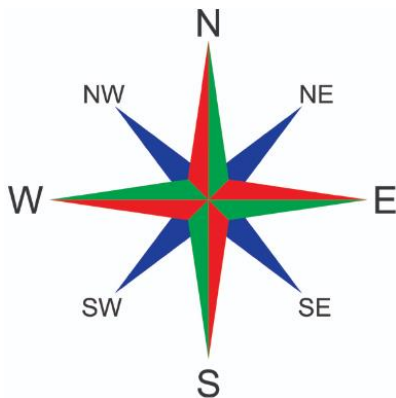

However, the country itself only covers 2% of the world's land area, making some areas of India overcrowded and busy.

Curriculum Drivers

Global impact- to understand the impact India has on the wider world including the UK.

Landscape- locate India on a map. You will need to describe the environmental regions and identify key physical and human features.
